Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 38-40, 42, 44-45 are rejected under 35 U.S.C. 102(e) as being anticipated by Lau et al-5,873,906.

As to claims 38-40, 42 and 44-45, Lau-'906's Fig. 13 partially reproduced on next page shows substantially every claimed limitation.

2. Claims 38-40, 44-45 are rejected under 35 U.S.C. 102(e) as being anticipated by Thompson-6,132,460.

As to claims 38 and 42, Thompson's Fig. 7 partially reproduced below shows substantially every claimed limitation.

FIG. 7

Notice that there is no specific limitation defining various elements as recited in the claims, such as a longitudinal strut (claim 38) or apex portion (claim 38) or a circumferential connecting strut (claim 38) in the claims. Therefore, it would be reasonable to interpret these elements in various ways that meet the limitations of the claims.
